

Care for your pharmacy so that pharmacy can care for you

Caring for our teams

- Please be patient, we are much busier than usual
- Respect our staff, they are here to help you
- They have families too and are here despite very challenging circumstances
- We will under no circumstances tolerate abusive behaviour towards pharmacy staff

Caring for your health

- There are many more prescriptions than usual at the moment
- We are working hard to prepare your prescriptions safely
- Some prescriptions may take longer than usual to get ready
- We may reduce our opening hours to allow us to keep up with prescription demand
- Medicine stock levels are close to normal in the vast majority of cases
- Please order only those medicines that you need

Caring for each other

- Please observe social distancing marks
- Follow one in, one out instructions
- If you have a regular prescriptions delivery, please ask a family member or friend to collect in the first instance
- This allows us to concentrate on those who cannot leave their homes due to isolation

We are in this together
We will get through this together
