CliniSkills are the nationally commissioned provider for clinical examination skills training for Community Pharmacists and have a dynamic and engaging online learning platform, alongside Allied Health Training who take pride in delivering comprehensive and specialised training programmes, that will provide you with face to face training to equip you for your expanding role. The face to face sessions will provide you with the clinical examination skills you need to confidently assess common conditions, high risk presentations and red flags, as well as conduct hands on examination services such as ear, nose and throat with confidence.

Before attending, please ensure that you have registered with CliniSkills and have completed the gateway module. It would also be advisable to have completed the ENT module and any others ahead of the date. Please find the direct link to registration below
